TO WHOM IT MAY CONCERN

DECLARATION OF CONFORMITY

Distributor's Name:
BergHOFF Worldwide NV

Distributor's Address
Boterbosstraat 6/1
3550 Heusden-Zolder
Belgium

Declares that BergHOFF Worldwide takes care that all the used materials in our articles, are safe for consumer use when used in normal conditions:

That implies that all the glass covers from the BergHOFF product range Geminis / Scala are covered by this Declaration.

The glass used for these glass covers is "Borosilicate" glass, with the following chemical composition:

SiO ₂	70,20%	Al ₂ O ₃	2,70%
Na ₂ O	6,70%	K ₂ O	2,00%
B ₂ O ₃	12,50%	Others	5,90%

The Boron Oxide makes the glass resistant for the use in oven (300°C) and for the use on top of a pot/pan on all existing cooking stoves. They also can resist the thermal shock between room temperature and oven temperature (Δ temp. 120°C) and vice versa.

Issued by authorized person
